SAFETY PRECAUTIONS

	⚠ DANGER Machine must be properly grounded to prevent electrical shock to personnel. Do NOT immerse the kettle, warmer, or any other part of this equipment in water. Always unplug the equipment before cleaning or servicing.
	⚠ WARNING Always wear safety glasses when servicing this equipment.
	⚠ WARNING Any alterations to this equipment will void the warranty and may cause a dangerous situation. NEVER make alterations to the equipment. Make sure all machine switches are in the OFF position before plugging the equipment into a receptacle.
	⚠ CAUTION This equipment is designed and sold for commercial use only. This equipment is not to be used by the consumer in home use. Do not allow direct contact of this equipment by the public when used in food service locations. Only personnel trained and experienced in the equipment operation may operate this equipment. Carefully read all installation instructions before operating the equipment.
	⚠ CAUTION This machine is NOT to be operated by minors. A minor is defined by any person under the age of 18.

NOTE

The information, specifications and illustrations contained in this manual represent the latest data available at time of publication. Right is reserved to make changes as required at the discretion of Gold Medal Products Company without notice.

GENERAL INSTRUCTIONS

INSPECTION OF SHIPMENT

Unpack all cartons and check thoroughly for any damage that may have occurred during transit. Damage claims should be filed immediately with the transportation company.

SETUP

Remove all packing material and tape before starting operation.

ELECTRICAL REQUIREMENTS

The following power supply must be provided:

Model No. 5330, 5330FN: 120 VAC, 60 Hz. 15A protected circuit.

Model No. 5330EX: 230 VAC, 50 Hz. 15A protected circuit.

Your electrician must furnish sufficient current for proper machine operation. We recommend this warmer be on a dedicated and circuit protected line. Failure to wire properly will void the warranty and can result in damage to the electrical components.

It is **Gold Medal®** Products Company's recommendation that this machine be plugged directly into a wall outlet. The use of extension cords is not recommended due to safety reasons and the warmers performance may be sacrificed.

BEFORE YOU PLUG IN YOUR MACHINE

1. Make sure that the wall outlet can accept the (3) prong grounded plug on the power supply cord.
2. The wall outlet must have the proper polarity. If in doubt, have a competent electrician inspect the outlet and correct if necessary.
3. **DO NOT** use a (3) prong grounded to a (2) prong un-grounded adapter.

INSTALLATION INSTRUCTIONS

INSTALLATION

1. Install Graphics (Model No. 5330FN or Part No. 37003)
2. Remove white cable tie from unit and position the racks in correct position.
NOTE: Keep black cable ties in place. Top and middle racks are positioned under rack mount bolts on the rack supports.
3. Plug power cord into outlet.
4. Turn on power switch located on the rear of the unit.
5. Pre-heat the unit for approximately one hour. The “I” setting is for low warmth and the “II” setting is for high warmth. “O” represents the off position (See below).

6. Dispensing temperature for cheese cups is between 125°F and 140°F.

OPERATING INSTRUCTIONS

CONTROLS AND THEIR FUNCTIONS

1. For warming cheese cups, use only the “II” high warmer setting.
2. Pretzel warming can be done using the “I” high or “II” low settings for desired warmth.
3. Other foods may also be warmed using this machine.

NOTE: This unit is only for the warming of prepackaged food products. Do not dispense volatile foods.

CARE AND CLEANING

CLEANING GUIDELINES

The plastic exterior of the *Cheese Cup Warmer* is easy to keep clean. Usually a damp cloth will remove all dirt and grease spots.

1. Turn power switch to the off position.
2. Disconnect the unit from power source.
3. Confirm the unit is cool and unplugged.
4. Wipe down exterior surface of unit.
5. Wipe down interior areas of the unit.

CLEANING AIR INTAKE

Gold Medal® Product's recommends that the air intake is cleaned on a weekly basis.

1. Disconnect Unit from Power supply
2. Use a vacuum cleaner or a damp cloth to clean air intake.
3. Position unit for normal operation and reconnect to power source.
